AegisGate Forensic Incident Report: #1 - SQL Injection Infiltration Attempt

Generated at: 2026-11-01 18:41:57 UTC | Engine: AegisGate IDS vv1.0

1. Executive Incident Summary

Over 4m 0s, client 10.0.4.22 triggered 4 security events (1 Scanner_Probe, 1 Information_Disclosure, 2 SQL_Injection) before being mitigated.

2. Campaign Attributes

Attribute	Value	Attribute	Value
Incident ID	#1	Client IP	10.0.4.22
Severity	CRITICAL	Status	OPEN
Primary Attack	SQL_Injection	Assignee	Alex Rivera
First Observed	2026-11-01 17:33:07	Last Updated	2026-11-01 17:37:07

3. Kill-Chain Progression & Forensic Events

Timestamp	Stage	Attack Type	Payload / Activity Snippet
17:33:07	RECON	Scanner_Probe	/demo/api/users
17:34:07	PROBING	Information_Disclosure	/demo/api/users?search=admin
17:35:07	EXPLOIT	SQL_Injection	/demo/api/users?search=admin' OR '1'='1
17:37:07	BLOCKED	SQL_Injection	Event logged

4. Threat Mitigations & OWASP API Top 10 Alignment

Standard	Vulnerability Class	Automated Action Taken	Recommended Backend Fix
OWASP API1:2023	BOLA / IDOR	Flagged & Monitored	Validate user ownership context on object keys
OWASP API3:2023	Broken Object Property	Payload Inspection	Reject unexpected mass assignment fields
OWASP API4:2023	Unrestricted Resource	Rate-Limited (429)	Apply sliding-window per-client quotas
OWASP API8:2023	Security Misconfig	Honeypot Trap Auto-ban	Remove default admin and test routes
